# A Fearless Approach to a Final Result: Conservative Full Mouth Rehabilitation Utilizing State of the Art Composite Resin Technique

**About the Speaker:** Dr. Stewart has a thriving restorative and cosmetic practice in Flower Mound, Texas, just north of Dallas. Dr. Stewart is one of only 147 dentists worldwide that has completed the extensive curriculum of Orognathic Bioesthetics International and in 2006 became a teaching faculty member for OBI.

He also serves as a mentor for the Schuster Center for Professional Development in Scottsdale, Arizona. Dr. Stewart has studied extensively at the Pankey Institute and LVI, completing the Master Advanced Anterior Restorative Course. He is a member of the American Dental Association, Texas Dental Association and the Academy of General Dentistry. He is a sustaining member of the American Academy of Cosmetic Dentistry and is currently working on his accreditation within the academy. Dr. Stewart currently serves as the President of the Texas Academy of Cosmetic Dentistry.

**About the Course:** In today's economic climate, having the ability to offer your patients a conservative and economic alternative to occlusal and esthetic rehabilitation is a must. In this course, you will learn a simplified system to restore proper form and function to your patient's mouth giving them a comfortable bite and a beautiful smile. And it is all completed in composite, making it affordable for your patient and profitable for you.

Learn three skills/techniques to increase case acceptance:

- Occlusion simplified – restoring a full mouth case in composite
- Smile analysis and design
- The “Preview Party” – a great marketing technique that will result in increased acceptance for cosmetic cases
